Idea Name (max. 50 characters) 30/50

The Moss Lawn: Save the Planet

Describe your idea in a short sentence (max. 130 characters) 30/50

Our company is The Moss Lawn, and our mission is simple: make lawns sustainable. And we're going to do it using moss.

Idea Details

Our company is The Moss Lawn, and our mission is simple: make lawns sustainable. And we're going to do it using moss. Why moss? Because moss requires no mowing, no watering, and no fertilizing. Not only does lawncare require a lot of your time and money, but it causes a lot of destruction to the environment.

About

This is the third milestone project of the fullstack software development course of Code Institute. It is the first 'full stack' project combining a database, a backend and a frontend. The aim is to demonstrate a full understanding of Python, MongoDB and Flask.

The project revolves around the mastery of the CRUD concept: **Create**, **Read**, **Update** and **Delete**. Being able to use this concept, opens a whole new world of possibilities to create web apps.
